

Deployment diagram — hospital (draw in Apollon)

Nodes (3-D boxes), nothing extra:

Node	Stereotype	Inside it
Smart Badge	«device»	artifact Staff Identity Token
Dispensing Cart	«device»	artifact Cart UI, component Dispenser
Transport Terminal	«device»	component Dispatch Controller
Central Pharmacy Server	«machine»	component Pharmacy Manager
Central Logistics Server	«machine»	component Dispatch Manager

Communication paths (plain lines between nodes, no arrowhead, label = protocol):

- Smart Badge — Dispensing Cart: NFC
- Smart Badge — Transport Terminal: NFC
- Dispensing Cart — Central Pharmacy Server: TLS
- Transport Terminal — Central Logistics Server: gRPC

Interfaces (lollipop on the provider, socket on the requirer, named after the service):

- Dispenser (socket) requires → Pharmacy Manager (lollipop): **Prescription Authorization Service**
- Dispatch Controller (socket) requires → Dispatch Manager (lollipop): **Transport Scheduling Service**
- Dispatch Controller (socket) requires → Dispatch Manager (lollipop): **Orderly Availability Service**
